---

HTML5 | CSS3 | JavaScript | JQuery | Python | PHP | SQL | Github | Git | VS Code | Command Line

## PROJECTS

---

### Coffee Shop, [Repository](#) | [View Live](#)

A coffee shop website demo featuring an animated landing page (CSS keyframes), CSS grid, testimonials slider, and a responsive design.

- HTML5, CSS3, JavaScript

### Landing Page, [Repository](#) | [View Live](#)

A landing page featuring animated objects (CSS keyframe), portfolio section, contact form, accordion for FAQ's (JavaScript), and a responsive design.

- HTML5, CSS3, JavaScript

### Book List App, [Repository](#) | [View Live](#)

A book list app that keeps track of the books you plan to read and the books you've already read. Users can add comments and ratings, move books from the unread list to the completed list, and delete books from either list. Alert messages are displayed whenever a book is added, completed, or deleted.

- JavaScript, Bootstrap, HTML5

### Personal Portfolio, [Repository](#) | [View Live](#)

My portfolio website that features a light/dark theme switch, animations from Animate On Scroll Library, responsive design, mobile-first approach, CSS animations using keyframes

- HTML5, CSS3, JavaScript

### Bank Account, [Repository](#) | [View Live](#)

A program that allows users to make deposits, transfers, withdrawals, and view their balance and recent transactions.

- Python, Object-oriented programming
